

Respect Customer,

Subject : Registration of our firm in your approved list of vendors

Dear Madam / Sir,

SAGAR FORGE & FITTING is a metal supplier of industrial metal products including stainless steel, carbon steel, nickel, alloys, aluminium, copper, brass and bronze in all ASTM grades. Our well-established and trusted relationship with the mill depots guarantees an uninterrupted supply to you of virtually any kind of metal products.

Over the past years, we have developed the skills needed to service the international community.

We carry this moment to present ourselves as one of the leading and largest importer, manufacture, stockists & supplier of various items which are mention below. It is urged by us to place your timely enquires to us in these particular items.

ENQUIRIES ARE HEREBY REQUESTED IN

Metal product include :

- Nickel Alloy bars, Sheets, Plate, Pipe and Tubing
- Titanium bars, Sheets, Plate, Pipe and Tubing
- Stainless Steel, Copper, Aluminium and Carbon Steel tubing and Pipes
- Stainless Steel, Copper, Brass Aluminium and Carbon Steel Sheets and Plates
- Stainless Steel, Copper, Brass, Aluminium and Carbon Steel Structural and Bars
- Wire Products, Welding wire and electrode in all Stainless and Nickel Grades
- Nuts, Bolts and Valves in many Stainless, Copper, Brass and Nickel Grades

Manufacturer :

- Flanges and fittings in Nickel Alloys, Stainless, Titanium and carbon steel,
- Forgings in all grades of Nickel Alloys, Stainless and Carbon Steel,
- Copper Range - HEX BRAND Copper cable lugs, inline connector 1.5 SQR mm to 1000 SQR mm, Copper bus bar, rod, flexible braid etc.

Our Stainless Steel products are used in first stage and second stage processing for a wide variety of ASME products including pressure vessels, furnaces, heat exchangers, boilers and more.

Test Certificate of the materials from Govt. approved lab. Can be provided. Guarantee Certificate of the materials can also be obtained from us the third party inspection is also allowed.

Above Items, where you shall definitely receive our ECONOMICAL OFFER with FLEXIBLE TERMS, that will benefit your order conditions.

As we are willing to all your business condition. Please do not hesitate in responding back to us by placing your timely enquires in our favour.

For **SAGAR FORGE & FITTING**

ANIL JAIN

BRIEF DESCRIPTION OF ITEMS

MANUFACTURERS OF : MILD STEELS / FORGED CARBON STEEL FLANGES AND STAINLESS STEEL FLANGES

Type	: Slipon, Blind, Weld Neck, Threaded & Socket-Weld, Lap Joint
Specification	: Bs 10 Table - D, E, F, H, J & K ASA 150, 300, 600, 900, 1500 and 2500 lbs. DIN NO 6, 10, 16, 25 and 40 IS 6392, 1538

MATERIALS OF CONSTRUCTION :

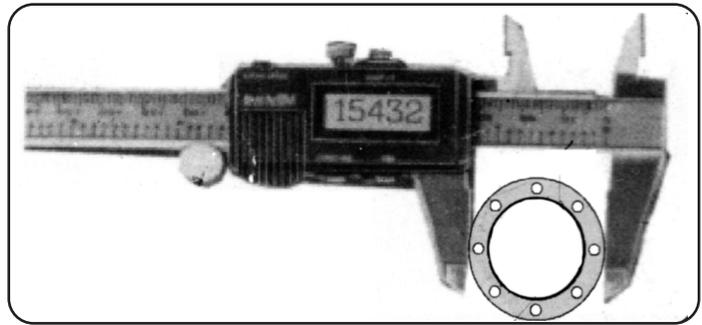

Mild Steel	: MS IS 226, 2062 & Boiler Quality
Carbon Steel	: ASTM A-105, A-181, Gr. I/II
Stainless Steel	: A-182 Grade F 6, F 304, F 316
Dimension Standard	: ANSI B-16.5 and MSS-SP-44, API 605, AWWA 207, ASME B 16.47

FITTING :

- Buttweld Forged Steel Elbows (1.5D) and Bends (3D)
Size : 1/2" to 12" SCH. 40, 80 and 160
As per ANSI B 16.9
- Forged Carbon Steel, Fittings for High Pressure of 3000/6000 lbs.
Types : Union, Coupling, Elbows, Tee, Nipple,
Reducers.
Size : 1/2" to 6" DIA
Ends : Socket / Butt Weld, Flanges BSPT/NPT
Specifications : As per ANSI B 16.11
Note : Above Flanges and Fittings will be with
IBR / Non IBR. We will be arrange for
third party inspection.
Ex- Stock : From 1/2" to 6" Fittings, 1/2" to 24"
Flanges ASA 150 and 300 lbs.

Specialisation :
 DOUBLE FACE
 SERRATED SURFACE
 THREE GASKET GROOVES
 IBR CERTIFICATES
 RAISED FACE
 COLLAR & SCREWED
 BLUE PRINT
 & Also as per Drawings

FLANGES SUITABLE FOR UPTO 60" O.D. PIPE

QUALITY POLICY

Strict quality assurance system is being followed in all our departments and Total quality Management is applied to streamline and all the procedures and practices are in operation to achieve high standards of efficiency. Continuous efforts are being made for improvement of materials, technology and equipments to give best quality products at the most affordable prices.

Quality Assurance Plans

Quality Assurance Plans are prepared in accordance with specific requirements stated by the customer and respective ASTM specification. Mandatory and supplementary requirements are translated to special instructions and audits performed during manufacture inspection.

Inspection stages and check hold points are decided to carry out in process inspection and record imported stages of inspection and tests.

ORGANISATION: A separate Quality Assurance/Control Department function under the control of management, independent of production. The quality Assurance Department oversees all important quality functions and performs the following activities.

MATERIAL CONTROL SYSTEM : This system controls the quality of all incoming material. The incoming material specification are correlated with Raw Material test certificate of the material.

The checks tests are documented. The material is given internal control no and same is recorded for future reference.

PROCESS CONTROL SYSTEMS : During forming forging and heat treatment, process control system outlines inprocess checks and controls to be followed during heat treatment and testing. Forging and interim heat treatment in the process control reduce the changes of introduction of variables in the process.

Each lot of fitting as defined in ASTM specification are subjected to Heat treatment and testing.

Testing is performed in accordance with specification requirements. Test data is evaluated by QA department and recorded in an appropriate format, supplementary tests like radiography ultrasonic, corrosion testing etc. is done as per code guide lines.

MACHINING & DIAMENSIONAL CONTROL : Suitable fixtures and heat are used to maintain dimensional accuracy stability - Necessary gauges and callipers are calibrated periodically to maintain their accuracy.

FINISHING PAINTING & MARKING : Carbon and Alloy steel fitting are shot blasted or pickled and panted. Stainless steel fitting are pickled and passivated. All fitting are market with size, schedule, specification and manufacture stamp.

Equipment calibration and audits are done as per quality plans.

CERTIFICATION AND SUPPLEMENTARY TEST : Fitting supplied to the QAP are supplied with test certificate. Test certificate incorporated, chemical mechanical and hardness properties, Also it gives details of Heat treatment, Hydro test pressure, supplementary test and stamping details.

Additional information and test data is furnished as per customer requirement.

CORROSION RESISTANT STEEL THAT WE OFFER

AISI 302

An austenitic stainless steel, which because of its ability to attain high strength and ductility through moderate or severe cold working, can be used for automobile trims, conveyor belts, transportation cars such as railway coaches, metal fixtures for construction purposes, roof drainage products, storm door frames and tableware.

AISI 304

It is the most widely used austenitic stainless steel. Popularly known as 18/8 stainless steel, it has excellent corrosion resistance and forming characteristics. Used in chemical, petrochemical and fertilizer industries, and as equipment in dairy, food processing, pharmaceutical industries, in hospital, households as kitchen ware, cryogenic vessels and as heat exchanger in air conditioning refrigeration, for machinery in paper, pulp and textile beverage sectors.

AISI 304L

An austenitic stainless steel similar to AISI 304 with less carbon (0.03%) is used in place of AISI 304 for improved resistance to intergranular corrosion. It is used for parts and structures which cannot be heat treated for stress relieving after welding.

AISI 309 / AISI 309S

These are austenitic stainless steels which are strong and tough. Because of their higher nickel and chromium content, these are used for application requiring high scaling resistance and corrosion resistance. They find their use for air heaters, annealing boxes, bak oven equipment, boiler baffle plates, carburising boxes, chemical processing equipment, dryers, exhaust manifolds, furnace parts, gas turbine parts, heat exchangers, jet engine parts, oil burner parts, oven equipment, petroleum refining equipment, etc.

AISI 310 / AISI 310S

These are austenitic types with higher chromium and nickel content than 309/309S. Because of their relatively high creep strength and mechanical properties at higher temperatures these steels find their applications for higher temperatures and severe service conditions. Used for air heaters, annealing boxes, ovens, carburising boxes, fire box sheets, furnace linings, furnace stacks and dampers, gas turbine parts, heat exchangers, kiln linings, nozzle diaphragm assemblies for turbo jet engines, oil burner parts, paper mill equipment, oil refinery equipment, recuperators and so on.

AISI 316

An austenitic stainless steel with 2.0 to 3.0% Mo. which improves corrosion resistance and imparts high strength characteristics. Used for applications requiring resistance to pitting corrosion and in halogen atmospheres. Typical applications: architectural trims, marine exteriors, chemical processing equipment, food processing equipment, petroleum refining equipment, pharmaceutical equipment, photographic equipment, pulp and paper processing equipment, textile finishing equipment, etc.

AISI 316L

An austenitic stainless steel, is Modification of type AISI 316 (contains a

maximum of 0.03 percent carbon) with reduced tendency towards carbide precipitation without addition of a stabilising element. Recommended for parts which cannot be heat treated after welding.

AISI 317 / AISI 317L

There are austenitic stainless steels which are modifications of type AISI 316 / AISI 316 L and offer increased chromium, nickel and molybdenum ranges for improved corrosion resistance. The steels were developed to resist attack of sulphurous and compounds. They resist Fitting in phosphoric and acetic acids. Application include paper pulp handling equipment, process equipment for producing photographic chemicals, bleaching solutions and handling sulphurous acetic, formic, citric and tartaric acids. They have the best corrosion resistance to body acids and blood and are recommended for surgical bone applications.

AISI 321

An austenitic stainless steel similar to AISI 304 but stabilised with titanium to avoid intergranular corrosion. Type AISI 321 resists scaling and vibration fatigue. It is used for aircraft exhaust stacks and manifolds, pressure vessels, large mufflers for stationary diesel engines, carburetors, expansion bellows, stack liners, fire walls, etc.

AISI 347

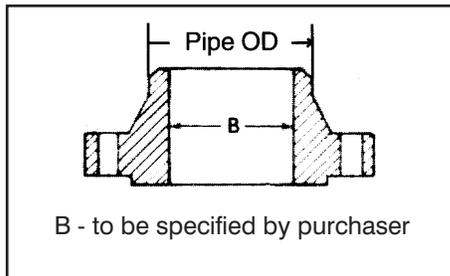

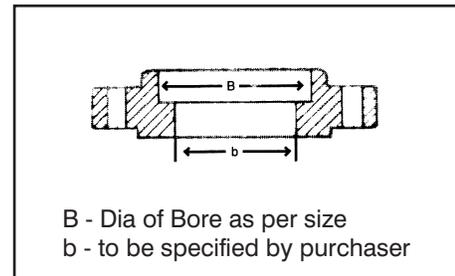

An austenitic stainless steel similar to AISI 321 but stabilised by Columbium which does not appreciably reduce the overall corrosion resistance. Recommended in the range of 240° to 900° C for parts fabricated by welding and which cannot be subsequently annealed. Applications include airplane exhaust stacks, welded tanks for chemicals, heat resistors, jet engine parts, expansion bellows, etc.

AISI 409

It is the lowest alloyed straight Chromium ferritic stainless steel. It replaces carbon steels and low alloy steels where some amount of heat or corrosion resistance and higher strength are required and where appearance is secondary. It is used for finds in heater tubes, transformer and capacitor cases, dry fertilizer spreaders, automotive exhaust systems including mufflers, resonators, silencers, pipes and emission control units, high pressure agricultural spray tanks, culverts, shipping containers and farm equipments.

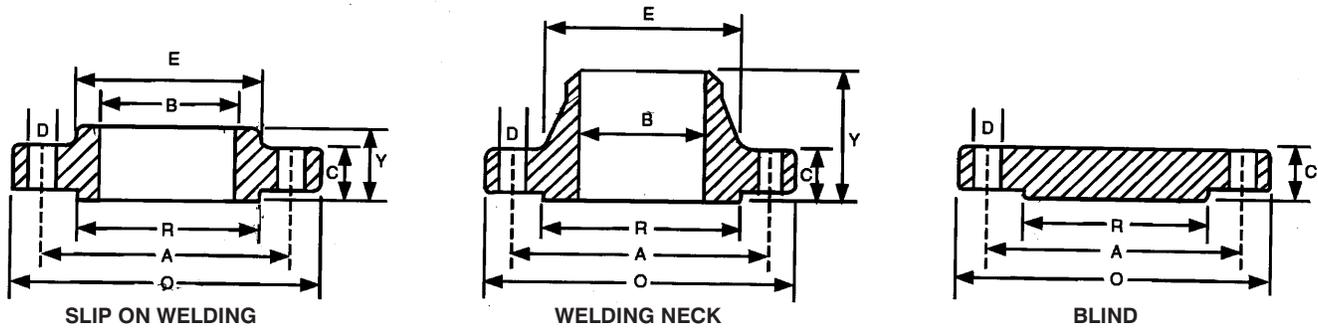

AISI 410 / 410S

AISI 410 is the most commonly used 12% Chromium martensitic stainless steel. Excellent combination of toughness and strength can be developed through proper heat treatment. This steel has better corrosion resistance in the hardened condition. It is a good choice when good formability and high strength are required and the end use demands resistance to mildly corrosive environment. It is used for furnace parts and burners operating below 650° C micrometer parts, tray supports, caps and vaporisers in petroleum fractionating towers, lining for reaction chambers, coal screens, fishing tackles, keys, lamp brackets, rules and tapes, wall screens, steam turbine buckets, blades, buckets covers, pump parts, petrochemical equipment and press plates. Type AISI 410 S is low carbon modification of AISI 410.

	CROSS RECESSED COUNTERSUNK MACHINE SCREWS		HEXAGON THIN NUTS (LOCKNUT)
	COLLAR COMBINATION PHILIPS PAN HEAD MACHINE SELF TAPPING SCREWS		NYLON INSERT SELF LOCKING NUTS
	CROSS RECESSED PAN HEAD MACHINE SCREWS		SERRATED LOCK WASHERS
	HEXAGON HEAD TAPPING SCREWS TYPE AB		SPRING WASHER
	SLOT PAN TAPPING SCREWS TYPE AB AND B		PLAIN WASHERS
	SLOT COUNTERSUNK TAPPING SCREWS TYPE AB AND B		THREADED RODS

FORMULA OF CALCULATING WEIGHT

- 1) **WEIGHT OF S. S. PIPE**
 $O. D. (mm) - W. Thick (mm) \times W. Thick (mm) \times 0.0248 = Wt. Per Mtr.$
 $O. D. (mm) - W. Thick (mm) \times W. Thick (mm) \times 0.00756 = Wt. Per Feet.$
- 2) **WEIGHT OF S. S. ROUND BAR**
 $DIA (mm) \times DIA (mm) \times 0.00623 = Wt. Per Mtr.$
 $DIA (mm) \times DIA (mm) \times 0.0019 = Wt. Per Feet.$
- 3) **WEIGHT OF S. S. SQUARE BAR**
 $DIA (mm) \times DIA (mm) \times 0.00788 = Wt. Per Mtr.$
 $DIA (mm) \times DIA (mm) \times 0.0024 = Wt. Per Feet.$
- 4) **WEIGHT OF S. S. HEXAGONAL BAR**
 $DIA (mm) \times DIA (mm) \times 0.00680 = Wt. Per Mtr.$
 $DIA (mm) \times DIA (mm) \times 0.002072 = Wt. Per Feet.$
- 5) **WEIGHT OF S. S. FLAT BAR**
 $Width (mm) \times Thick (mm) \times 0.00798 = Wt. Per Mtr.$
 $Width (mm) \times Thick (mm) \times 0.00243 = Wt. Per Feet.$
- 6) **WEIGHT OF S. S. SHEETS & PLATES**
 $Length (Mtrs) \times Width (Mtrs) \times Thick (mm) \times 8 = Wt. Per PC$
 $Length (Fit) \times Width (Fit) \times Thick (mm) \times 3/4 = Wt. Per PC$
- 7) **WEIGHT OF S. S. CIRCLE**
 $Dia (mm) \times Dia (mm) \times Thick (mm) \div 160 = Gms. PC$
 $Dia (mm) \times Dia (mm) \times Thick (mm) \times 0.0000063 = Kg. Per PC$
- 8) **WEIGHT OF BRASS PIPE / COPPER PIPE**
 $O. D (mm) - Thick (mm) \times 0.0260 = Wt. Per Mtr.$
- 9) **WEIGHT OF LEAD PIPE**
 $O. D. (mm) - Wt. (mm) \times Wt. (mm) \times 0.0345 = Wt. Per Mtr.$
- 10) **WEIGHT OF ALUMINIUM PIPE**
 $O. D (mm) - Thick (mm) \times Thick (mm) \times 0.0083 = Wt. Per Mtr.$
- 11) **WEIGHT OF ALUMINIUM SHEET**
 $Length (Mtr.) \times Width (Mtr.) \times Thick (mm) \times 2.69 = Wt. Per PC$
- 12) **WEIGHT CONVERSION OF MTR. TO FEET**
 $Wt. Of 1 Mtr \div 3.2808 = Wt. Per Feet.$

APPLICATIONS :

- ◆ **ACID & CHEMICAL INDUSTRIES**
- ◆ **AUTOMOBILE INDUSTRIES**
- ◆ **BEVERAGE INDUSTRIES**
- ◆ **CEMENT INDUSTRIES**
- ◆ **ELECTRIC & ELECTRONIC INDUSTRIES**
- ◆ **FOOD INDUSTRIES**
- ◆ **OIL & GAS INDUSTRIES**
- ◆ **PAPER & PULP INDUSTRIES**
- ◆ **PHARMACY INDUSTRIES**
- ◆ **POWER PLANT**
- ◆ **REFINERY PLANTS**
- ◆ **SUGAR INDUSTRIES**
- ◆ **TEXTILE INDUSTRIES**
- ◆ **WATER PIPING SYSTEMS**
- ◆ **WIND POWER PLANT, ETC.**
